## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5-7, 13-14, 18-21, 23-27, and 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Afzali-Ardakani et al, 5,527,838 (hereinafter Afzali-Ardakani), for reasons of record.

Applicants argue that it is not enough for the examiner to state that it is well known for fluorine-containing polymers to have lubricious properties without specific support and in relying upon the theory of inherency, the examiner must provide a basis in fact and/or technical reasoning to reasonably support the determination that the allegedly inherent characteristic necessarily flows from the teachings of the applied art.

In this concern, it is the examiner's position that as part of a molecule fluorine is known to be "anti-social" and seeks to get as far away from other molecules as possible. Anything close is automatically repelled and can't stick, thus lending to the property that is known as being "slippery". Accordingly, the examiner's position remains that fluorine compounds are known in the art for their unique characteristics such as being non-sticking and slippery.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 1774

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 5-8, 13-14, and 18-32 are provisionally rejected on the ground of

nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3, 5-8, 13-14, 18-32, 44, 46-47, and 50 of copending Application No. 09/620,526.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the coated strands of each application are substantially the same and it would have been an obvious variant to the skilled artisan to form the coated fiber strand of the copending application into a fabric as presently claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicants' remarks regarding the double patenting rejection have been noted. However, the presence of an unresolved double patenting *rejection* hinders this application from being in condition for allowance.

No claims are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. "Features of Fluorochemicals", DAIKIN Industries, LTD – discloses basic information known in the art regarding fluorine and fluorine compounds.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
